Create New Invoice

1. In the Sales Module, Select Invoice.
2. Click on “+Add New” to create a new invoice.
3. Unique invoice numbers will be generated automatically.
4. Upon clicking the “**Customer Name**” field, a drop-down list will appear for the existing customers or you can even make sales on **Cash**. Select the desired customer name from the list or type in the name manually. If the desired customer name is not previously created, click on the “Add New” option and fill in the details to create the customer. When the customer name is selected, their PAN No. will be shown next to it or if Cash Account is selected a new field to input the customer name will appear.
5. In the “Reference” field, type in the code or information manually as you desire. You can also convert previously created quotations or sales orders by clicking on the search icon and selecting from the list.

(In case of the Conversion of quotation or sales order to invoice, the reference code will be tracked automatically)

6. Select Payment mode (Cash, Credit or Bank Deposit)
7. Select the “Delivery Date” on which the products will be delivered to the customer.
8. Enter the Credit date limit in numeric format to determine when the due will be cleared (This will help us in the Invoice aging report)
9. Select the product/service from the list. If an item is previously not created, click on “Add New” to create a new item. If the item is used in the previously created quotation, sales order or invoice, the rate shall be displayed automatically.
10. Enter quantity, and rate and tax will be automatically applied if applicable.
11. You can provide notes to customers, reporting tags and custom fields.
12. Click on the “Save” icon.

When a selected invoice is opened, options can be used to print or convert to receipt the selected invoice.

Convert to Receipt –This option helps you convert the selected invoice into “Receipt”.

Preview/PDF/Print: For any document opened you can preview, print or save as PDF. Nepal Ebilling offers a pre-designed template for the user, however, you can design/change the templates from “Configuration” in “Printing Templates”.

Documents/Comments: You can add documents related to this sales invoice & add comments for future reference.

Credit Note / Sales Return

Credit notes are documents created by the seller to the buyer indicating cancellation/acceptance of the return of a certain product/service. A credit note gives you an important ability to cancel out an already issued invoice, either in full or in part and relieves the buyer from the obligation of payment.

In Debit Notes, you can create, edit or delete debit notes for the previous sales invoice.
